

Pre-session Quiz: Antibiotic Resistance World Antibiotic Awareness Week 2019

Please tick as many answers as appropriate

Name (use your initials please):

Age:

School:

What can become resistant to antibiotics?

Viruses	
Humans	
Bacteria	
Animals	

Most viral infections, like coughs and colds, will get better with:

Liquid intake	
Bed rest	
Healthy living	
Antibiotics	

How can we prevent antibiotic resistance?

Finish the course of antibiotics	
Share antibiotics with friends and family	
Do not use antibiotics for self-limiting infections like coughs and colds	
Only using antibiotics prescribed to you by your doctor/nurse	

How can we prevent the spread of antibiotic resistant bacteria?

Wash hands regularly	
Prepare food hygienically	
Take antibiotics regularly	
Keep vaccinations up to date	

Overuse of antibiotics can:

Help treat self-limiting infections like coughs and colds	
Damage our normal/useful bacteria	
Increase resistance to antibiotics	
Leave the body more likely to get an infection from harmful bacteria	

Score: ____/5
