

Sexually transmitted infections in England, 2024

Between 2023 and 2024, infectious syphilis rose to 9,535 diagnoses.

Gonorrhoea diagnoses decreased over this time period to 71,802, but remained at very high levels.

Diagnoses of infectious syphilis amongst men who have sex with women (MSW) has **increased by 24%**, and **by 1%** in women who have sex with men (WSM).

While more new STIs are diagnosed among people of White ethnicities, some Black ethnic minority groups have disproportionately higher diagnosis rates.
