

S. aureus (MRSA & MSSA) bacteraemia and *C. difficile* infections

MRSA bacteraemia

MSSA bacteraemia

C. difficile infection

2 of 2

Gram-negative bacteraemias (*E. coli*, *Klebsiella* spp. and *P. aeruginosa*)

P. aeruginosa bacteraemia

April - June 2018

7 out of every

100,000 persons

developed a *P. aeruginosa* bacteraemia

April - June 2019

8 out of every

100,000 persons

developed a *P. aeruginosa* bacteraemia

Klebsiella spp. bacteraemia

April - June 2018

18 out of every

100,000 persons

developed a *Klebsiella* spp. bacteraemia

April - June 2019

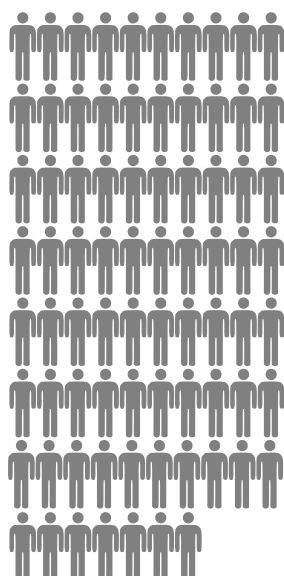

18 out of every

100,000 persons

developed a *Klebsiella* spp. bacteraemia

E. coli bacteraemia

April - June 2018

77

out of every

100,000 persons

developed an *E. coli* bacteraemia

April - June 2019

78

out of every

100,000 persons

developed an *E. coli* bacteraemia
