Professor Sue Fairweather-Tait	18
Professor Alison Gallagher.....	23
Professor Marina Heinonen.....	30
Emeritus Professor Harry J McArdle.....	31
Emeritus Professor Anders Sjödin	32
Dr Darren Greenwood	33

Types of Interest

Personal or family¹ financial interest

Personal financial gain or financial gain to a family member through, for example:

- holding a directorship, or other paid position in an organisation related to the work of the UKHCC;
- carrying out consultancy or fee-paid work for an organisation related to the work of the UKNHCC;
- having shareholdings or other beneficial interests in a business related to the work of the UKNHCC;
- receiving expenses or hospitality to attend conferences or workshops or similar meetings related to the work of the UKNHCC, from any organisation other than their employer;
- receiving gifts with a value greater than £25² (for personal interests only) from organisations related to the work of the UKNHCC; or
- receiving honoraria for meetings or similar, related to the work of the UKNHCC.

Members should declare any active or controlling role in an organisation related to the work of the UKNHCC and whether or not the cumulative total of all personal financial interests from a single body/source related to the work of the UKNHCC exceeds £5,000 per annum. Where the value of shares may fluctuate, the declaration should be made based on the situation as at 1st January each year. This declaration should be for the value of the shares alone, not the cumulative total of shares and any other financial benefit from the same organisation.

Members should declare the funding source of their salaries, should it be derived from an organisation other than their main employer if this connection could be construed as having the potential to influence their judgement in the exercise of their duties.

The holding of financial instruments such as a pension scheme would not be counted as a financial interest provided the member or family member has no influence on the management of the financial instrument.

Non-personal financial interest

Payment or other benefit to an organisation in which a member is employed, which is not received personally but is for work in which a member is directly involved or is directly responsible for, from a body relating to the work of the UKNHCC, including:

- a grant or fellowship or other payment to sponsor a post, or contribute to the running costs of the department;
- commissioning of research or other work, by a unit in which a member is employed;
- funding for, or other contributions to, research; or

¹ Spouse or partner and dependents

² Value taken from PHE's Conflicts of interest policy and procedure

- contracts with, or funding from, PHE.

Members should declare whether or not the cumulative total of all non-personal financial interests in a single body/source exceeds £5,000 per annum.

Members are not required to declare all relevant interests of their co-workers, it is only necessary to declare those in which a member is jointly involved or for which a member has oversight / responsibility.

Personal non-financial interest

This refers to a situation in which a member has acted in a way such that the public might reasonably believe that he or she may not consider evidence in a fair and unbiased manner.

Examples include:

- active advocacy on behalf of an organisation with a strong opinion on a matter under consideration;
- other public or published statements expressing a clear opinion about a matter under consideration;
- holding office in a professional organisation, charity or advocacy group with a direct interest in a matter under consideration by the UKNHCC;
- authorship or co-authorship of a document used as evidence in a matter currently under consideration by the UKNHCC.

Considering that members are appointed on the basis of their scientific expertise on topics related to the work of the UKNHCC, it is expected that papers authored or co-authored by members will be used to inform the UKNHCC's opinions. It is not necessary to include a list of publications or articles in the register of interest, but where a member's paper is considered as part of an opinion, this should be highlighted in the minutes of the relevant discussion.

If a member has an interest not specified in these notes but which they believe should be declared, they should seek advice from the secretariat.
