

Protecting and improving the nation's health

Quarterly Epidemiological Commentary: mandatory MRSA, MSSA and Gramnegative bacteraemias, and C. difficile infection (data up to January-March 2019)

1 of 2

S. aureus (MRSA & MSSA) bacteraemia and C. difficile infections

MRSA bacteraemia

January-March 2018

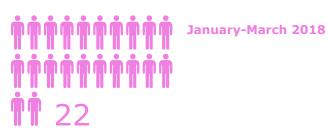

January-March 2018

out of every

100,000 persons developed an MRSA bacteraemia January-March 2019

out of every 100,000 persons developed an MRSA bacteraemia

MSSA bacteraemia

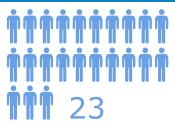

out of every 100,000 persons developed an MSSA bacteraemia January-March 2019

out of every 100,000 persons developed an MSSA bacteraemia

C. difficile infection

out of every 100,000 persons developed a C. difficile infection January-March 2019

out of every 100,000 persons developed a C. difficile infection

Protecting and improving the nation's health

Quarterly Epidemiological Commentary: mandatory MRSA, MSSA and Gramnegative bacteraemias, and *C. difficile* infection (data up to January-March 2019)

2 of 2

Gram-negative bacteraemias (*E. coli, Klebsiella* spp. and *P. aeruginosa*)

P. aeruginosa bacteraemia

out of every 100,000 persons

January-March 2018

January-March 2019 mmmmmm

out of every 100,000 persons

developed a *P. aeruginosa* bacteraemia

developed a *P. aeruginosa* bacteraemia

Klebsiella spp. bacteraemia

January-March 2018

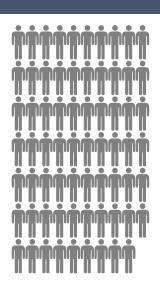

January-March 2019

out of every 100,000 persons developed a *Klebsiella* spp. bacteraemia

100,000 persons developed a *Klebsiella* spp. bacteraemia

E. coli bacteraemia

January-March 2018

out of every

100,000 persons

developed an

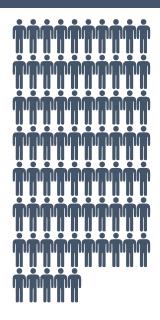

E. coli bacteraemia

January-March 2019

out of every

100,000 persons
developed an

E. coli bacteraemia
