Terms of Reference

1. Overview

The Joint Biosecurity Centre (JBC), part of NHS Test and Trace, aims to identify early outbreaks of COVID-19 and to ensure local and national decision makers have access to expert analysis and insights when responding to outbreaks within their jurisdictions. The JBC has developed analytical methodologies to assess data and contextual information to build a picture of COVID-19 risk to the UK. This enables local and national decision makers to manage the COVID-19 risk from both National and International transmission.

These arrangements may need revision in the following circumstances:

- Following the creation of the National Institute for Health Protection in 2021
- In the event of any future decision to place the JBC on a statutory footing.

2. Membership

Composition of the Board will include representation from each devolved nation (members) who will be supported by senior officials within JBC responsible for the delivery of JBC's four-nation approach (standing attendees).

It is not anticipated that voting will be necessary, but in the rare instance that it is, any decisions should be reached by members on a unanimous basis, or referred to the Ministerial Board.
