---	---	--	---	---	---	--

(i) Available to order from ImmForm for children 6 months to 2 years  
(ii) Some people may not accept the use of porcine gelatine in medical products such as LAIV. For details on alternative vaccine offer available mid-November 2020 see PHE information for healthcare practitioners 'The National Childhood flu Immunisation Programme 2020 to 2021'. Fluarix Tetra available to order from ImmForm from mid November 2020.  
(iii) The vaccination programme will be extended from 1 December 2020 to include the 50-64 year old age group subject to vaccine supply. This extension was phased to allow prioritisation of at-risk groups.  
(iv) Although aTIV is not licensed for those less than 65 years of age it is recommended that those who will become 65 years of age before 31 March 2021 can be offered the vaccine 'off label'  
(v) TIV-HD Trivalent influenza vaccine (Sanofi Pasteur) suitable for 65 years of age and over but not eligible for reimbursement under NHS flu vaccine programme  
(vi) Flublok Quadrivalent given authorisation for temporary supply by the UK Department of Health and Social Care and the Medicines and Healthcare products Regulatory Agency for immunisation against flu in this year's seasonal flu programme to meet public health need.  
(vii) From October 2020 Flucelvax Tetra licensed from 2 years of age.
