Waste Services

# Dorset Waste Partnership

Characteristic(s) / CSF(s):  
Managing Expenditure

## Problem and Approach

- At the time there were 6 District Councils and a County Council
- The Dorset councils wished to improve recycling performance and reduce the cost of the service.
- A single waste collection service was created. Collection methods were standardised, and routes were optimised across the boundaries of the authorities.

## Outcomes

- Collection methods were standardised, and routes were optimised across the boundaries of the authorities.
- £1.4m a year was saved from the new service
