# Oracle Cloud Standardisation

**Lambeth**

**Characteristic(s) / CSF(s):**  
Managing Expenditure  
Use of Digital and Technology

## Problem and Approach

- In 2016, the London Borough of Lambeth was coming to the end of a shared services partnership with six other councils that had contracted all of them to use the same Oracle Enterprise Resource Planning (ERP) software for the previous four years.
- This gave the council the choice between continuing to combine IT systems or to go solo.
- The decision was taken to put ERP, HCM (Human Capital Management), PBCS (Planning and Budgeting Cloud Service) and payroll all in the Oracle Cloud.

## Outcomes

- Moving from on premise to the Oracle Cloud and digitising paper documents in Microsoft OneDrive helped the council reduce its workspaces from 14 buildings down to just two properties.
- £4.5 million savings
