72% of those cases are caused by smoking

Lung Cancer Risk

- Your risk of lung cancer is higher if you have a close relative (such as a parent or sibling) who has had lung cancer.

- Previous lung diseases can increase your risk of lung cancer. These risks are usually higher in smokers.

- Air pollution can cause lung cancer. It causes around 10% of lung cancer cases in the UK and depends upon level of exposure.

- Diesel exhaust increase the risk of lung cancer.

- Some substances including asbestos, silica, and cigarette smoke.

- Around 7 out of 10 lung cancers are caused by smoking. This includes breathing in other people's

- Many lung cancers do not have a single cause

You're **four times** more likely to quit with the right support.

When you decide it's time to stop smoking, we will help you find the services and support that are right for you.
