

London Health and Care Integration Collaborative

Programme Update Report - September 2013

Purpose of the paper: This paper provides an update on the programme of work agreed by the Collaborative.

Collaborative members are asked to:

- Note the contents of the update
- Identify leads from the Collaborative to provide advice to the programme team on the development of the deliverable and a voice on behalf of Collaborative members and peers.

Programme Objectives	Timescale	Progress to date	Related work being led by LGA on behalf of the National Collaboration
<p>A compelling narrative Draw on the material available to date to develop a compelling narrative on integrated care and support that can be used to secure enhanced common purpose and agreement across NHS and Local Government.</p>	<p>September 2013</p>	<p>Discussion taking place with Collaborative on 11th September to agree a narrative.</p> <p>NHS England London Region have also commenced work on the development of an integrated care case for change in line with A Call for Action.</p>	<p>Narrative for integrated care</p>
<p>Integrated Care and Support in London (Rapid Review) Gather intelligence on the integrated care landscape across London to provide a fuller picture of the initiatives being developed across health and social care systems.</p>	<p>August – September 2013</p>	<p>Programme team have aligned London’s rapid review with the national approach to gathering information.</p> <p>This work is being aligned with the national review being undertaken by Integrated Care. In capacity as Chair of the Collaborative, Geoff Alltimes has written out to CCGs, LAs, and</p>	<ul style="list-style-type: none"> • Searchable database of integrated care initiatives in England and internationally. • Individual value cases (8-12) highlighting specific localities and what

		<p>Health and Wellbeing Boards encouraging systems to respond and complete the national questionnaire to gain a robust understanding of the integrated care work taking place and developing across London. The outputs of this process will feed into a national database and inform the case for change and Collaborative's programme of work.</p> <p>The database will contain the key information required to inform London's understanding of what is taking place on integrated care.</p>	they have achieved
<p>The evidence base Summarise and signpost the existing evidence base and build mechanisms to develop the evidence base further working with the AHSNs (review of evidence)</p>	<p>September 2013- ongoing once established to remain up to date</p>	<p>Desk top review and collation of evidence commenced to form a knowledge library.</p> <p>Work is being aligned with the national review of evidence to ensure robust coverage and reducing duplication of effort.</p> <p>Initial discussions commenced with AHSNs to understand the work they are undertaking and identify further work required.</p>	Evidence review of integrated care
<p>Measuring integrated care and support Build on the national work in relation to measuring patient/citizen experience and develop proposals for how integration might be measured at the level of level of Health and Wellbeing Boards</p> <p>This project will collate the measures currently being used by integrated care systems in London in order to identify common ground and contribute to the discussion about measures for the Integration Transformation Fund.</p>	<p>August – September 2013</p>	<p>Initial review undertaken and measures collated into a balanced score care approach. This work has been shared with the National Collaboration via NHS England with significant interest in the approach.</p>	<p>Development of Excel modelling tool to assess impact of integrated care based on standard and localised data and assumptions. To be available in beta early September</p>

<p>Key success factors and barriers to change</p> <p>Identify and share learning on the core issues. Drawing on national and local experience an initial list of success factor and barriers might include:</p> <ul style="list-style-type: none"> • Collaborative Leadership • Re-imburement, incentives & Contracting • 3-5 year local plans • Competition rules • Sharing information • Flexible workforce • CCG budgets <p>Starting with information sharing</p>	<p>Initial step to take place on 17th September</p>	<p>Following consultation, health and social care leaders have informed us that information sharing and governance should be a priority area of focus as it is preventing some systems move their integrated care agendas forward. To better understand the London position, the team has joined forces with the Patients and Information Directorate to help us to map and describe a baseline assessment of the projects and initiatives that are currently underway/ being developed in London that allow information to exchange across organisational and geographical boundaries. Senior representatives from NHS England, HSCIC, London AHSNs and ADASS have agreed to participate in this mapping exercise and attend a discussion, facilitated by the team, on 17 September.</p>	<p>Individual summaries and signposts to other resources for enabling integrated care (including commissioning, provider models, risk stratification, regulation, pricing).</p>
<p>Community Health Services commissioning guidance</p> <p>This project will undertake a rapid review of community health services in London leading to development of appropriate guidance to support commissioning of services from 2013/14.</p>	<p>CCG Community Health Service Guidance available October 2013</p>	<p>Interviews have commenced with community stakeholders from health & social care commissioners and providers.</p> <p>A London Community Nursing ‘think tank’ event is planned for early October with London and national community nursing and education leaders.</p>	<p>N/A</p>
<p>Build and maintain links to the National Collaborative</p> <p>Ensure alignment of the London Collaborative with national developments, Identify opportunities to avoid duplication of focus and outputs.</p>	<p>Ongoing</p>	<p>Close links have been developed and are being maintained with the national programme of work.</p> <p>The integrated care team are working closely influencing the development of the products and aligning London deliverables wherever possible. London integrated care systems are also being invited to test and shape the products being</p>	<p>N/A</p>

		developed.
